# WeAreMove

VPN Access

1. Download and install the client to connect to the VPN endpoint.
   If you already have it and are renewing the config, skip this step.

   https://openvpn.net/client/

   To install it, double click on the downloaded executable.

2. Run the client, it should look like:

3. Download (if you didn't) the attached files named:

```
de-username.conf - German gateway
il-username.conf - Israel Gateway
sa-username.conf - South Africa gateway
```

4. Double click on each of the files (or only on the one that you want/need), and click the OK button:

5. For the imported connection, you will be asked for a username and password, which you can find in a separate email, labeled: WAM-VPN-PASSWORD
The password is the same for all the connections. Check the box **Save password**

6. Set the 'Profile Name" to "DE GATEWAY" (or SA/IL)

7. Set the username and password, from the email labeled:
   WAM-VPN-PASSWORD

8. Click the connect button, it should look like this:
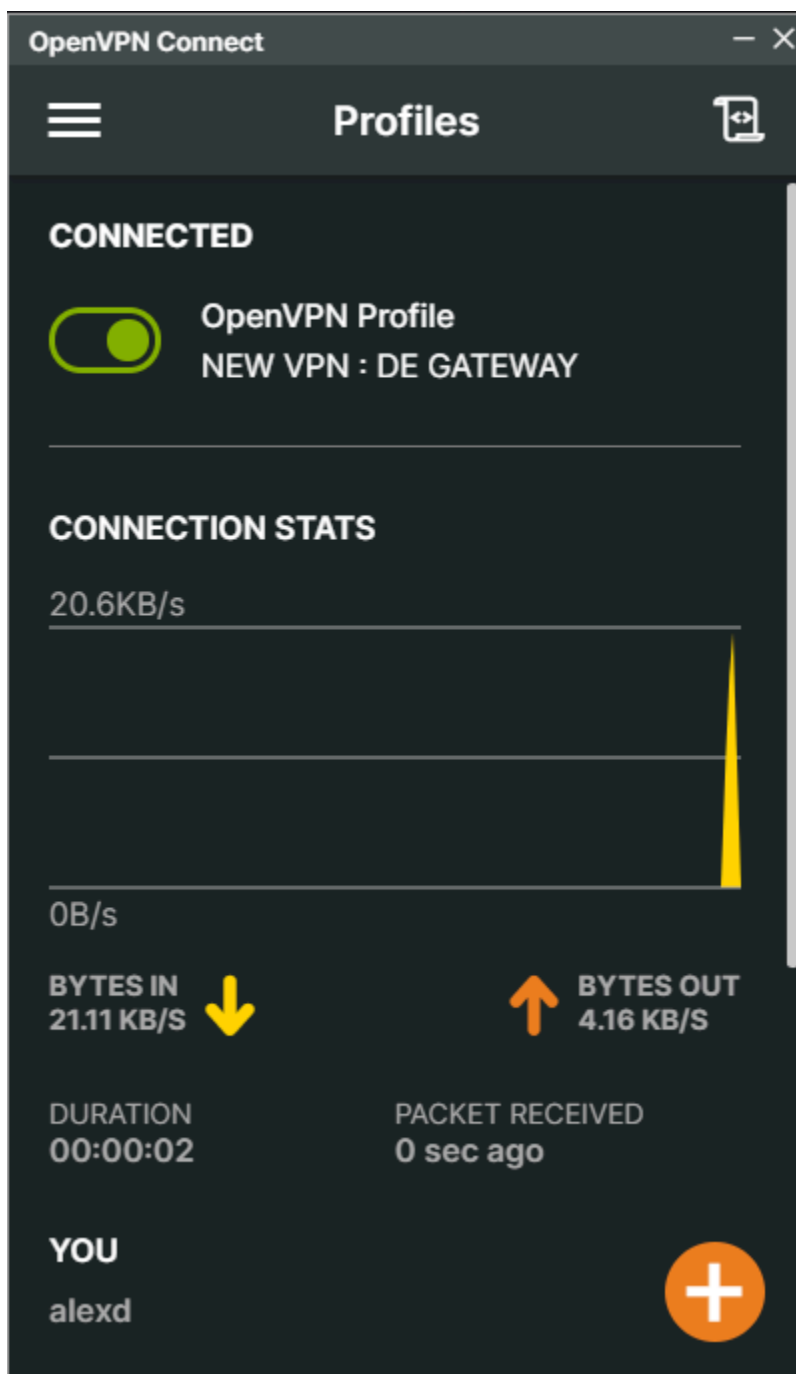

For any issues with the vpn, please reach out via email to vpnops@wearemove.io
